

So let's put **an end to**
preconceived ideas that...

*“STIs only happen
to other people!”*

...and **get informed.**

Preventing **STIs**
LET'S TALK ABOUT IT!

Sex, hook-ups,
love and **STIs***:

stay protected
and get tested!

Do not litter - February 2026

*STIs = Sexually Transmitted Infections

at
actions traitements
ASSOCIATION DE PATIENTS AGRÉÉE

Did you know that STIs can be asymptomatic?

However, regular screening allows you to:

- Diagnose and treat infections **quickly**
- Protect your health and that of your **partners**
- **Prevent** serious complications

When should you get tested?

- After risky sexual behaviour or if you have doubts
- If a partner **informs** you that they have an STI
- Every 3 months if you have **multiple partners**
- Before stopping **condom** use with your partner

Where should you **get tested?**

At a **CeGIDD*** or a **testing laboratory**. Free of charge (no upfront costs for those under 26, no prescription or appointment necessary).

More information at **questionsexualite.fr**

*Free Information, Screening and Diagnosis Centre.
List available on the Sida Info Service website.
